# What We Are...

## Silversky Group

Silversky Group is one of the best MEP Consultancy and Project Execution Company. Silversky also provide complete service in building and industrial automation along with Interior Service Fit-outs. At Silversky Group we approach each client with the specification of creating trust, by consistently performing in a manner that distinguishes us from our competition. We demonstrate our planning expertise, provide the service we promise and prove that our client is the most important member of the team. In our past years of experience, we have successfully executed many landmark projects and we have an excellent team of engineers who made this possible.

Our capabilities extend far beyond those of the traditional contractor. We define quality as the continuous contractors and even our customers, allow us to maintain this high level of excellence.

Reputations are developed over long periods of time, reflecting how a company responds & performs and how a job is completed. Silversky Group has worked hard in building a reputation of management integrity. Innovative engineering techniques, exemplary job site performance and playing a vital role as a member of the construction team are just a few of the qualities that make us unique.

*“What we realized is, we have to do what is right for our customers. No strategy is going to live longer than that”*

**:- Mr. A. T Sebastian, Director**

## PLANNING

Silversky Group recognizes and understands the client's objective to complete on time and within budget. Silversky Group also recognizes that to achieve the Prior commencement of each and every project, discussion with the client are held to identify and agree:

- Quality of planning required inconsideration of the project content, complexity and duration.
- Updating and development of the overall plan.
- Compatibility of the systems to be used with the overall project master plan.

## INSTALLATION

Silversky Group are able to provide highly skilled, experienced office and site based management personnel for successful execution as per the client requirements. On major projects key personnel, site manager, planning and purchasing etc. would be introduced at near stage to setup the necessary systems.

The Site Engineer would have the full responsibility for the construction activities and the authority to make decisions through out the construction period, reporting on a regular basis to the contract manager. The extent of site management requirements on minor contract works would be determined by the content and duration of each individual project.

## TESTING & COMMISSIONING

Silversky Group inspects, tests and issues appropriate certificates and documentation in accordance with the client specified requirements and statutory regulations. Silversky Group provides skilled technicians with the experience covering inspection and testing of installed products and process control systems which are as classified hazardous and non-hazardous. To ensure that our technicians are aware of and understand changing requirements and regulations in various working environments, frequent training courses are arranged. Silversky Group provides all measuring and test equipment, issued for inspection, calibration and testing of installations at site.

## Our Technical Advisor

*"From my technical background I understand the project lifecycle from design right through to procurement and delivery. Silversky group have created high performance teams that are able to deliver some of most complex and challenging projects All the Best and great future ahead"*

**:- Mr. V. Mohanachandran**  
**Rtd. Dpty. Chief Engineer, KSEB Ltd.**
